Work Experience

Web developer at [TopCV](#)

January, 2021 - Present

- Maintain and design systems and databases.
- Develop projects and features for the company's production and focus on the TopCV website and the internal operating systems.
- Train for other members, and sometimes take the Project Manager role for small projects with 3-5 members.

Web Developer at [Amit Group](#)

September, 2018 - January, 2021

- Designed systems and databases according to customers' requirements, developed and maintained the backend and frontend applications (admin sites) for most projects.
- Performed a full life-cycle of developing and deploying products.

Education

Bachelor in Software Engineering from FPT University

2021 - Present

Get a higher education to obtain the Bachelor's Degree.

Higher diploma in Software Engineering from FPT Aptech

2017 - 2019

Took this course to get the basics of becoming a developer.

Projects

[React hook guard](#) the open source

2021

Successfully built a routing and guarding library for Reactjs based on React-Router-dom 5 after three months of working with React and the original react-router-dom library. It helps my colleagues and me control the routing easily with multiple layouts, authentication, and authorization features of React app.

[tindohanghieu.com](#)

2019
